# Generations of excellence in food ingredients

---

vaneeghen brings centuries of innovation and excellence to ingredients for optimum health and nutrition. Founded in Amsterdam in 1662, today the 15th generation of the vaneeghen family stands at the helm of this company that stems from the Dutch Golden Age. Its main activity has always been transporting, producing, trading and distributing food ingredients.

The family-owned company has further refined its focus over the past 25 years to concentrate solely on providing optimum solutions and the highest quality ingredients for the health and nutrition markets.

Providing the safest ingredients that support customers to supply the best source of nutrition to their consumers worldwide is at the heart of vaneeghen's mission. Innovation, scientific research and expertise in regulatory place this centuries-old company at the vanguard of the 21st-century food ingredients. Today vaneeghen represents leading manufacturers around the world and is viewed as the trusted source of nutrition for all life stages.

Two business units: Infant Nutrition & Sports & Nutritional Supplements

---

# Top-quality nourishment: getting them off to a great start

---

The Infant Nutrition division within vaneeghen is a world-class provider of high-quality functional ingredients for infant nutrition and is one of the few companies in the EU solely dedicated to ingredients for human nutrition. We provide customers with a broad spectrum of ingredient solutions tailored to their product applications. The outstanding quality of our offering is reflected in the fact that our solutions have been approved by all major infant formula producers. The Infant Nutrition division is recognised as a trusted specialist and advisor that creates added value and provides access to a wealth of expertise and knowledge. Our commitment is to build long-term relationships with our customers based on trust and the highest quality services and products.

# Tap into a world of leading specialised knowledge and expertise

---

We are distinctive in the industry thanks to our independent technical department that encompasses unparalleled knowledge, expertise and experience in the highly specialised field of infant nutrition. It specialises in providing tailor-made technical and business support. Customers can count on the technical department's leading specialists for expert advice on matters such as formulations,

the qualification process, factory audits and microbiology. The department gives customers access to the latest insights into nutritional science, product development, marketing and supply chain management. This commitment to knowledge-sharing and industry-leading knowledge lies at the heart of the vaneeghen Infant Nutrition division's distinctiveness.

## 1. Producer

- Long term research and trials
- 
- Document and certification control
-

- Worldwide quality standards: EP, USP and/or FCC

Fig. 3

## Partnering for innovation

We work in close collaboration with start-ups and young innovative companies that focus on developing cutting-edge new products and technologies through our professional network that includes Wageningen University and the Dutch agri-food knowledge centre.

These collaborations make us part of the innovative vanguard of our industry. This inspires us and drives us to continuously innovate in order to provide even more state-of-the-art solutions for our customers.

---

# Leveraging our global network for tailor-made solutions

Our global reach lets us go the extra mile to meet even the most stringent of requirements. We work with a global network of suppliers and can tap into a vast database of ingredients so that we can provide truly

tailor-made solutions. Our flexible organisation is fully customer focused and flexible to allow us to respond to customers' needs agilely and effectively.

Fig. 4 Logistic services on a global scale, from the world to the Netherlands

## Keeping pace with the changing world of regulatory

Safety, stringent standards and optimum quality are key to addressing the needs of this special group of consumers. Global regulations are frequently amended in order to keep pace with this demand. Trading flows and import regulations change on a regular basis. This forces the entire industry to introduce measures to ensure compliance with the new rules. We help our customers stay ahead of the game by presenting the

right solutions and serving as a trusted advisor. In the changing world of regulatory, we provide the right ingredients at the right time and place and in the right way.
